

Flash Actionscripter

About Airlock

Airlock is a creative digital agency with a unique combination of marketing, design and technology talent.

We are on the lookout for talented individuals that truly love the digital space and who want to be involved in the process from end-to-end.

What's the job?

We are looking to extend our in house ActionScripting capabilities.

This is a fantastic opportunity for a candidate with creative flair and a head for code to make their mark within one of the industries most creative and forward thinking agencies. Our clients love us because we go the extra mile to make them look good and nothing is too hard or doesn't have a solution. And with clients including Diesel, Burberry, Motorola, BMW and Heineken, it's easy to be passionate about the work we do.

We're looking for an experienced ActionScripter to join our technical team and head up Flash development within the agency. We need someone who is passionate about digital, thorough, enterprising and has a bit of flare. Above all we are looking for someone with integrity who can think on his or her feet and pull the team in around them to focus on a common goal.

You need to be well organised and able to work autonomously; an excellent understanding of digital creative, web build and project management is essential. You must have at least 2 years digital industry experience and be up for a challenge.

Must have

- Great Flash/ActionScript ability, with 2-3 years professional experience including:
 - the capacity to create sophisticated class-based applications with streamlined code
 - a thorough understanding of Flash optimisation and system performance
- Sound XHTML, CSS & Javascript knowledge, with a good understanding of Web Standards
- A burning desire to produce fantastic work in a fast-passed agency environment

Should have

- Some PHP & MySQL development experience
- A good understanding of cross-browser and platform compatibility issues
- A creative outlook, with a good working knowledge of Photoshop and an eye for detail
- A deep love of Apple computers and a (healthy) contempt for Microsoft products

Would be nice to have

- Experience with using version control, preferably SVN
- Experience of encoding and working with video
- A flare for Table Tennis, with good top-spin forehand and a fast serve
